

## Water Conservation Rebates

### ***Make every drop count!***

The City of West Linn and Clackamas River Water Providers encourage water conservation to promote wise water use, because everyone depends on water! To help in this quest, Clackamas River Water Providers are now offering three water use rebates up to \$150 in value. These rebates are available on a first-come, first-served basis until the program funds are depleted.

#### **Toilet Rebate**

Older toilets use a lot of water - 3 ½, 5, or even 7 gallons with every flush. High Efficiency Toilets (HETs) use only 1.28 gallons per flush or less. Replacing a 3.5 gpf toilet with a 1.28 gpf WaterSense labeled toilet could save as much as 4,000\* gallons per person per year. (\*Based on the national estimate of 5 flushes per person per day). Apply for a \$100 rebate when you replace your current water-wasting toilet with a new HET High Efficiency Toilet. Limit: 1 toilet per household.

#### **Landscape Rebates (2 choices)**

Over-watering is the #1 cause of wasted water in the summer and the leading cause of plant disease and insect problems. Choose the items that will work best for you. Apply for up to a maximum combination landscape rebate of \$50 when you purchase a rain sensor and/or a manual hose bib timer. Limit: 1 rebate per household. Customers can take advantage of each rebate one time per account.
